PCMB – 89%

### SOFT SKILLS

Adaptability

Team Work

Communication

### EXPERIENCE

During my one-month internship as a Web Developer at Singaji Software Solution, I gained experience in workplace dynamics, including teamwork and client interactions. I created and maintained responsive web applications using HTML, CSS and Wordpress.

### PROJECT

#### Ecommerce Website

**Technology Used** – ReactJS and Tailwind CSS

**Description :-** Developed a responsive e-commerce website using Tailwind CSS and React. Utilized Redux for state management, React Router for navigation, and Formik and Yup for form handling and validation.

**Features :**

- **Add to Cart & Wishlist:** Users can add multiple items to their shopping cart & Wishlist.
- **Quantity Adjustment:** Users can increase or decrease the quantity of each item in the cart.
- **Remove Items:** Users can remove items from the cart and from wishlist with ease.
- **Dynamic Total Price Calculation:** The total price updates in real-time as items are added, removed, or quantities are adjusted.
- **Create Account :** User can create account .

#### Weather App

**Technology Used** – ReactJS and Tailwind CSS

**Description :-** Developed a responsive weather application using ReactJS and Tailwind CSS, designed to provide real-time weather data and forecasts.

**Features:**

- **Real-Time Weather Data:** Displays current weather conditions.
- **Today's Highlights:** Showcases important weather highlights for the day.
- **24-Hour Forecast:** Provides detailed weather information for the next 24 hours.
- **7-Day Forecast:** Offers a weather forecast for the upcoming week.
